MEMORANDUM FOR: NPIC COMIREX Representative

VIA: Chairman COMIREX

SUBJECT: Letter of Appreciation for NPIC Technical Support
Provided the COMIREX VHR Evaluation Panel

1. On behalf of the members of the COMIREX VHR Evaluation Panel, I wish to express sincere appreciation to the NPIC photo scientists, mathematicians, and engineers who assisted the VHR panel during its investigation of imagery resolution requirements. The value of having such expertise concentrated in NPIC as a resource for common support to the intelligence community has been demonstrated clearly during this exercise.

2. Although numerous NPIC personnel participated in this exercise during May through October 1970, I wish specifically to commend the following technical people for their expert and conscientious performance:

- 25X1 IEG [] for his imaginative approach to demonstrating factors other than imagery resolution which effect interpretability and for his expert technical counsel;
- 25X1 TSG [] for their assistance in performing the complex mathematical computation required to develop value vs. resolution curves;
- 25X1 TSG [] for his excellent work in evaluating the resolution of the sample high resolution imagery used in the study;
- 25X1 TSG [] for his conscientious and effective research of Brain Storm very high resolution analog imagery used in the study;
- 25X1 PSL [] and his lab team for their outstanding work in providing the highest of quality VHR prints for use in this analysis.

3. In conclusion, I wish to thank the supervisors of the NPIC technical support elements which made their personnel available to assist in the panel's efforts. Should further action be necessary to insure recognition of the valuable service performed by these people, I am at your service.

MEMORANDUM FOR: The NPIC COMIREX Representative

VIA: Chairman COMIREX

SUBJECT: Letter of Appreciation for NPIC Publication
Support to COMIREX VHR Evaluation Panel

1. On behalf of the members of the COMIREX VHR Evaluation Panel, I wish to express sincere appreciation to the NPIC Production Services Group for their outstanding support in the preparation of the Panel's Imagery Resolution Requirements Study of 30 October 1970. This large and complex report required an unusual amount of editorial, graphic arts, and publication skill which was displayed admirably by the NPIC team during the course of this community effort.

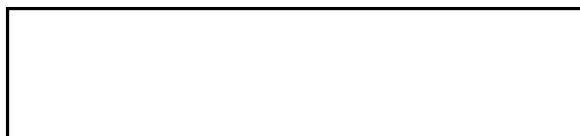

2. Without the cooperation of the Production Services Group the panel's report would not reflect the rigorous professionalism expected by the senior decision-makers who will review the report. We wish particularly to express our appreciation for the assistance provided by the members of the following organizations:
